

SAMARITAN'S PURSE WATER PROJECTS

Turning on the tap to safe water for communities. 

Samaritan's Purse Water Projects

Sunday School Curriculum

Most of us take water for granted. But here's your chance to teach the next generation just how scarce safe, drinkable water is in much of the world, what happens when children don't have it, and how young Canadians can make a difference.

These five downloadable, activity-packed lessons about water stewardship are designed to help you inform and keep young minds busy discovering how God wants everyone to have safe water and how they can help make that happen.

Use these lessons for your Sunday school, vacation Bible school program, or other children's program. If you have limited time, consider using lessons 1 and 4. Almost two in three people lacking access to safe water live on less than \$2 a day.
